

Robotics Assignment:

You will submit the following to the assignment folder called Robotics on D2L assignments tab:

1. Choose any kind of robot that exists (except the robot vacuum cleaner, which we covered in depth). For example, self-driving car, rescue robot, drone, etc.
2. Find at least 2 articles and cite them.
3. Discuss:
 - a. What is the purpose of the robot?
 - b. What are some of the sensors that they have, and how are the sensors used?
 - c. What about the Actuators/Effectors – Are there motors? Wheels? Etc.
 - d. How are these robots used in society now? What about in the future?
4. This must be in your own words. Plagiarism will be checked for.
