

Scratch Homework:

You must work individually on all homework.

Go to <http://scratch.mit.edu>

Create an **educational** game or story. The point will be to teach us something in a fun way!

1. You must have at least 3 levels/backdrops that get changed.
2. You must have at least 3 sprites, and at least 2 sprites must have their own scripts.
3. You must use at least one variable.
4. You must include user input somewhere.
5. You must include at least one conditional (if or if/else) **and** at least one loop used appropriately.

Submission: Post your Scratch activity on the D2L discussion board titled Scratch.

1. Post the URL (remember to share it first or the URL won't work).
2. In your own words explain what you did.
3. If you remixed an existing project, submit the original URL as well and tell us what is different in both versions (it should be significantly different!).
4. To get full credit on this assignment, you must try two of your classmates' activities and reply to their post letting them know what you thought and learned from it.
