

Options for building your robot:

1. Follow the default building instructions in the kit
2. Or go to the LEGO software:
 1. Bring up LEGO Mindstorms Education EV3 on your laptop.
 2. Scroll down the options on the left side until you find Model Instructions.
 3. Model Core Set - you can find additional building options here!
 4. Select one and click open.
 5. Click the little next arrow shown in this [diagram](#). See where my red arrow is pointing.
 6. From here you can click through the building instructions.
3. Or create your own design!
